

Portal 16 – Seeding Locamid Cells – Locamid GifTokens and Utilitokens Locatokens, Locacurrents

Purpose of Portal Project - Setting up strategy
action centers for a **Transvolutionary
Movement.**

They will be founded everywhere under all conditions.
At homes, stores, caves, offices, prisons, anywhere.
These tie into linking up with larger hubs.

Locamids are nodal points for empowered alignments in Action and Result.

Keywords: Triggering Events, Training through Teams, Transemployment, Hyperdimensional Exchange Building, get-togethers, fun, accomplishment, results

Wholo happens when diverse groups of people cooperate through creating Liberated Space.

Creating this together, we will not be halted. We will not have to comply. Power abuses end here.

We re-meter the **Circulation of Wealth**.

We birth a new **Geometry of Connectivity**.

Wholonomic Locamids emphasize sustainability and quality of life as opposed to mass production and bottom lines.

A non-violent structure of society is non-centralized as a system.

We end Pyranomics here.

Locamids provides that paradigm cornerstone of strength. Serve the nearest and the most distant will be served. Cooperative village life, 3-d printing combines. Living as simply as because we can, we do not need to fuel the illusions. We can find social harmony, we can find happiness and spiritual fulfillment. Realizing oneness of life will set limits to our wants. We can dedicate your life to helping others in a trust field of flow and friendship. We can create new myths out of our lives.

Through our rebellious awakening and then deeds we become the founders of a **new kind of order.**

We can bring closer to each other the effects of how we live.

Localized gift economies can boom.

People participating in all new ways for providing and accessing goods and services and relationship and intelligent design beyond fiat control.

Freeshops, gift circles, reputation building, offering and requesting skills, tools, lifts, advice, stuff and time for free.

Couchsurfing, freeconomy and freecycle have membership in the millions and are growing by the second. This shows the interest for this is everywhere.

A viable Locamid is a community made up of neighbors who cherish and protect what they have in common. Means of exchange that has a localized value, usually within a region or between people with specific community connections. Represents agreements that acknowledge trust in the community itself, rather than the federal government, big banks, or corporations

The first Spheres are close to home, friends and family, mostly a gift economy, some informal barter, sharing; direct and indirect reciprocity; based on unconditional love and trust.

Keep the wealth created by the exchange of goods and services within the local community - minimize extraction, exportation, or non-mutual benefit by entities outside of the community.

Multiplier effect: shopping locally keeps 3x more wealth in community, 3x more jobs.

Facilitates abundance rather than scarcity. There is no need for a scarce means of exchange when we have lots of time and creativity. More Regional Spheres recreates a local or bioregional economy that is suited to its ecology and community needs

.Encourages greater sustainability through import replacement and sustainable production processes. Friends, acquaintances, small businesses, local government; local currencies. formalized reciprocity and sharing like libraries, community gardens.

Links unmet needs with otherwise unused resources.

Stronger and greater numbers of community relationships, which enhances a different kind of economic security and spiritual connection.

Community and individual self-determination and sufficiency- local control over economy and therefore more local self-governance, transparency, participation and feedback.

Insulates communities from the roller-coaster market economy.

Different forms of exchange facilitate community resiliency.

Represents real value created by our communities, not market value.

Protest against unfair and unsustainable global economy.

Fundamental Shift of the Totality
The Wholomid is a spontaneous
creative agreement to create a
tolerant and cooperative
community by radically giving up
the old.

This becomes a **Hyperdimensional Mandala of Everyone**. **We as Peoples** not mere individuals, isolated and alone, suppressed and disempowered, fragmented within and without. **We as Peoples**, whole and complete. Through **dimensional realignment** we can collectively realize a **prior always alignment**. Then We have say on how it is.

How are we to protect ourselves?
Develop and put into practice the
Portal of the local economy.

Authentic community is Prosperity.
The more it grows, the more resilient
and connected we become.

We have been under the tyranny of the story of money our entire lives. We are the only species in the known universe that seems to believe it needs symbolized paper to survive.

Pyranomics relentless drive to convert our social, ecological, cultural and spiritual commons into cold, impersonal numbers has been so complete, that few of us can imagine a way of being human where money doesn't mediate the relationships through which we meet our needs.

Pyranomic's goal is to maximize profit at any cost to relentlessly pursue the bottom line.

As long as we have extremes of poverty and wealth we have to have violence.

Much of which comes from maximizing output per worker, regardless of health and safety concerns.

Most businesses, especially those producing the essential requirements of life, operated as cooperatives. agricultural and housing sectors Persons and families become each private **enterprises.**

Regionals are Transtructural public utilities, “no-profit, no-loss.”

Locamids and Wholo'Teams and Wholotics

Even in the midst of thousands of other people around us, we have become more isolated than ever before.

Locamid teams are intended to reduce co-optation and ego trips, infighting and agenda hi-jacking.

We start with the most simple things, such as being kind, and respectful, and just in our dealings with others.

We move on repair injustices of the past. We can achieve results for the good people; who invest time, work and resources without establishing a way that again oppresses society **ensuring that the needs of people, plants, animals are met.**

We create an environment where people can lose their fear.

Locamids are tribal founded aligned with larger scales of tribal life for this globalized age. This way we can reduce the isolation of the individual. Knew all members of your tribe on a very personal level, decisions affecting the community made together and swiftly implemented.

Towns and cities neo-tribalized so we can know our neighbors on more personal levels. we now live in towns and cities or even hubs where you hardly know your neighbours. Even in the midst of thousands of other people around us, we have become more isolated than ever before.

Our direct interactions with nature
to replace factory farms and
impersonal supermarkets.

We with Group creativity replace
entertainment distractions and
addictions.

Politics concentrates power in fewer and fewer hands. Wholotics involves directly in decision making and implementing.

Vote change nothing. Power has migrated to career politicians who are lobbied and financed by big corporations and “too big to fail” banks, financed by Pyrabanks, controlled by Pyrasites who make the vital decisions for the disempowered People.

The purpose of political parties is usually to get into government to implement policies of the party.

Political parties mirror the society as it is. A “steering committee” or something similar is top, elected party members next then the regular party members. Conventions give the illusion to the individual party members that they have the power.

Topics are decided beforehand by smaller groups and committees. The structure is pyramidal. The purpose being getting into and staying in power. People disagreeing face expulsion and loss of party membership if they do not stick to the party line. Once in power, original goals lose their importance.

Leaders get co-opted and corrupted.

Political parties keep the current system functional giving the illusion that people have a say.

Parties split society along party lines the same as religions and ideologies split society along belief lines. Political parties are unfit to solve problems to the system where they exist.

Initiatives against this or that or to save this or that. focus on a single issue not addressing the array of other problems that are present. If they are lucky, they reach their goal- let's say to prevent the construction of a motorway. Then their purpose is fulfilled and they disappear. If they do not reach their goal they disappear out of frustration of the people involved.

Liberal and conservative and other voices of the status quo have utterly failed society and the Earth.

Humanity with inequitable and unaccountably massively skewed consumption gradients and with highly entropic production methods and reptoid paradigms is operating well beyond the Earth's carrying capacity. This seems irrefutable.

Many great Movements have tried to live in communities of their own, leading the way by giving an example of how things can be done differently.

These movements have rightly identified the community as the basis for change.

Locamids point to a ***wholistic way of human life***. Indigenous cultures have successfully lived in tribes in harmony with their fellow humans and in balance with nature for countless thousands of years and are teachers.

Through Locamids, “neo-tribal arrangements” we can create connection that is real and substantial. Affirm deep personal connection between humans and between humans and nature.

Isolation equals disempowerment.

Humans feel helpless when isolated. People do not engage to replace the failing system with something better because they feel powerless or perceive the powers that shouldn't be as being the normal state of affairs that cannot be altered.

Resulting from the isolation from nature and fellow human, instead of developing their intrinsic individual spirituality and respect and understanding for everything that is, people follow various religions, look for gurus and ideologies to fulfill their need of spiritual community. This is exploited by those who want control and domination or, even worse, it is used to turn humans against each other.

Any movement aiming to replace the failing system with something better must create an environment where people can connect with one another on a deep personal level as well as with nature, which they are part of.

When we can bypass the fear and isolation that allows control and domination and massive destruction we can begin to evolve ways that allow our natural ways to flourish.

Where we can effect meaningful and lasting change,.

Wholo'tribes can take care of all of our needs, physical (food), emotional (closeness to other human beings) and spiritual (knowing that the entire tribe depends on nature and thus the tribe is embedded in the wholeness of everything there is).

Living more tribally enables a deep knowledge of your fellow human and an appreciation of his/her personality, virtues and traits. It was almost impossible for one person to dominate.

Wholoteam Leadership emerges naturally to solve a certain puzzle and dissolved again when the puzzle is solved

Like a family, the tribe was based on mutual respect and even love. It was an environment where fear, isolation and domination were absent.

No government, police, judges and prisons were needed.

The various Locamids will interact with each other on the basis of mutual benefit. Conflict among them rare and evolutionary.

Wholomidal life will far superior to any other form of societal organization in human history, be it feudalism, dictatorship, absolutism, kingdoms, empires, or even so called classes of democracies.

As Tribal life is centered around the circle, so does the Wholomid. Decision making conducted in a circular manner.

We became human when we started to form circles to figure out how best to survive and develop. This is core to our natural state of being as a human.

Everyone is the Holopex of the Wholomid.

Elders hold wisdom in that they have more life experience. So they highly regarded and well cared for. The tribe as a whole cares for the children.

Locamids

- Takes care of the food supply
- Provides shelter and security
- Takes care of the elderly, sick and young
- Enables deep knowledge of and love for all members of the tribe (closeness)
- Recognizes the multitude of different personalities and the freedom of the individual
- Is based on mutual respect, co-operation and love
- Creates an environment without fear, isolation and domination
- Enables a permanent balance with nature and all other life on this planet for very long periods of time
- Enables spiritual development through direct and co-operative interaction with nature

Let's be straight here

- tribal life is almost extinct because of the onslaught of modern Parasitic civilization creating the dire situation humanity finds itself in at present, a situation where we are slowly poisoned, where we face complete annihilation with permanent war, while masses go hungry and die. Food security is destroyed by depleting soils, herbicides and GMOs and the contamination of the planet's water to a degree where it becomes undrinkable.
- Civilisation is a blind alley leading to a cliff of an abyss deepened by technological advances. We are moving towards a dead end.

- Wholotics is radically decentralized power, a holistic approach. The organisation reflects the society we want to create. Living what we preach. We transform into communities that provide everything a tribe does a modern tribe, interacting with the world around it on the basis of mutual benefit.
- Everyone is important
- Every critical thinking opinion has validity
- Everyone to express themselves listening to what others say
- Domination Filters
- Creating mechanisms whereby we support each other in all life situations (sickness, bereavement, loss)
- Caring for the wellbeing of all
- Making decisions as equals taking into account the longterm effect of our decisions
- Growing as much of the food we need in a co-operative way to again connect to nature and our spiritual selves
- Fear and isolation can disappear and a tribal spirit emerge.
- Evolve into a stable community where we can take care of each other instead of being taken care of.

Where we decide. Instead of being led like a flock of sheep.
Where we can become increasingly independent from the unfit old system until it is no longer needed.

Network with other organizations or communities that have developed along similar lines.

A synthesis of modern technologies and solutions, ancient knowledge and wisdom, modern science and intrinsic human spirituality and bring together the suffering people in the industrialized world and the developing world.

Pyranomic activity Damages Local Integrity

Seeks areas of the world where wages are low and human-rights laws are lax ensuring low wages by maintaining excess unemployment in the worker pool

Disempowers communities through lobbying, policies and legal action

Uses scale to reduce per-unit costs, regardless of how much of a product is actually needed and what are its externalized costs

Orients production towards the buyers who can pay the most not who needs it the most

Concentrates capital due to winner-take-all competition and unfettered "free" markets

Pumps money into advertising to create imagined needs

Promotes the myth that happiness lies in consumption

Leads to:

Widespread unemployment and plummeting wages

A dwindling middle class and a growing income gap between rich and poor

An impoverished working class

Dangerous or mind-numbing manufacturing work

Exploitation of child labor

A disenfranchised populace that's easily incited to fanaticism, violence or terrorism

Demographic upheavals with ruptured families due to lack of local work.

Widespread hunger and accompanying disease

Erosion of democracy, human rights and worker rights

Environmental damage compounding due to manufacturing and shipping that is unneeded

Globalizing Pyranomics depends on cheap oil for manufacturing and transportation, making any kind of oil-based manufacturing or transportation systems difficult for a local business.

Money and to a large extent community has long since been robbed of meaning and connection.

Debt Free and Interest Free, Free from State control, in a few years Wholonomics could be raised to the backbone of a world power.

We can finance this entire plan without gold and without usury or debt.

We can create fundamental changes we need by changing our economic agreements. We stand here on the verge of a new way of relating to each other and the Earth.

Healthy communities nurtured and cultivated.
the people, the community and the bioregion.

Stop bleeding wealth from local communities
and impoverished third world.

All persons obtain their minimum requirements
of life, food, education, health care, clothing and
housing.

Wealth distributed Automatically.

Locamids

Takes care of the food supply

Provides shelter and security

Takes care of the elderly, sick and young

Enables deep knowledge of and love for all members of the tribe (closeness)

Recognizes the multitude of different personalities and the freedom of the individual

Is based on mutual respect, co-operation and love

Creates an environment without fear,
isolation and domination

Enables a permanent balance with
nature and all other life on this planet
for very long periods of time

Enables spiritual development through
direct and co-operative interaction
with nature

Portal 16 – Locamid – Locamid Beautification Token

Project series Make “Locamid” beautiful Each Locamid Wholomid will issue local currents to achieve beautification results.

Facebook and website posts pictures of before and after achieved by person or small teams. They are award Locamid (named for area being focused on) they can spend with participating Giftoken Currents that are issued by businesses wanting to support a good cause and acquire new customers. These Giftokens are traded or shared for beautification results. A fun contest also.

Employ local teams needing employment sign up local establishments, with a tracking mechanism, agree to exchange something for Locamid tokens. They also get marketing results and more business.

Plus they earn token themselves and the value of the token can go up.

A local business agrees to receive say 200 GifTokens valued at \$5 each or \$1000 retail or barter level pricing. Or maybe if we can incentivize these token enough, \$10,000 or 2,000 Beauty Tokens.

Beauty Token Generators will be able to use in other ways. This becomes a barter exchange to improve Locamid Places.

On a Facebook Group and website pictures of say a vacant lot filled with trash.

Locamid Tokens are earned by a combo of hours (1 Locamid Token per hour plus use of equipment and transportation, voted value by value of the result to be determined.

Types of beautification projects

Cleaning vacant areas and forests

Planting vegetation

Painting ugly walls – Painting art over strategic places

Painting etc. Old Storefronts

Helping people clean their yards

These are simple tasks with the right guidelines and would provide employment by the underutilized. Help local team building and esteem building.

Governments might want to be enrolled as well as local schools

**Locamid GifTokens
become Currents
as they are exchanged
or consumed**
