100k Targeted Emails List For A Crowdfunding Campaign

The list sources are very valuable and updated weekly with new potential backers.

It is one of the cheap and most profitable strategies for those who understand it well. Here is little Math done.

CALCULATIONS:

Let's say you invest \$45 and got the list of 100,000 Potential Backers. After sending emails on safe side lets assume only 0.5% backers. Assuming \$100 occurs 0.5% of 10k (Message sent) is 500 members 500 members multiply by \$200 raising = \$100,000

Selling product nobody can be forced to buy unless your campaign satisfy a very hot need of someone at a very cheap price so before bulk mail ask the same Question to yourself either if someone sends you same stuff would you buy or no and If answer is no than first edit your sale page or select any other product. That's the best idea to get a successful crowdfunding campaign. Remember people want to satisfy themselves not you.
