

*Becoming conscious and active with the deeper archetypal processes collectively being played through us unconsciously then subconsciously is the very act that effects its transformation.*

*We are enabled to collaboratively channel this causation constructively, this overwhelming power on the threshold of consciousness.*

*We can cross this threshold and seize hold of the personality of the collective. When this is ready to be integrated, this will appear physically.*

*This forces the subjects into their own form getting dreamed up into materialization.*

**Almost everyone would agree, replacing our current economic direction with all its embedded conditions of poverty and conflict and social inequality with one that reflects and expresses our human good would be great.**

**Is this even possible? To start anew on new foundations, a fresh start. What would this look like, feel like, sound like, taste like? What are the parameters, the conditions, the components of this new civilization?**

**Can we as humans actually  
deconstruct corporate and fiat  
rule? Can we break it down?**

Can we clear the crystallized  
compressions of our collective  
circumstances?

**Portex Currents and Tokens** are  
Global Context Tools for restoring  
wealth accounting and wealth  
transacting to the betterments of the  
commons.

Wholonomics services a revolutionary  
open whole source purpose.

We use the most direct path  
to prototype and project  
our transparent intentions.

We fulfill each project's purpose  
evolving **peer intelligence pathways.**

We create these **keyed value tools** to be as simple to use as possible, however complex the backend.

User interfaces are friendly and irresistible, an inspiration for the ease of experience a support for becoming viral models.

# **Wholonomics Portex 0 - EcoChange**

is a construction of interactive Portexes each with token and current sets with unique protocols linked together by Group Smartchain Rails for the purpose of triggering accelerated evolution of cultural norms.

Wholonomics combines  
both closed and open  
operating structures depending  
on the elegant parameters determined  
for the specific Portex Protocol.

**Wholonomic Currents** are **order holders** expressing token functions.

They hold properties, rights, and obligations of the whole enabling actors to do things, to act or delegate project functions.

A primary goal of Wholonomics is to service risk free facilities for wealth generation through the entire supply and consumption chains.

**Currents have smart security or utility tokens managing the logic and maintaining values while building more and more features into the **Wholonomics Ecology.****

# **Token keysets and Current keysets**

have specified conditions,  
defined contracts and limitations,  
necessary functions,  
an issuer,  
a substrate  
and classes of users.

These provide the framework for  
determining the elegant solution

Keysets are active deliverers of value through Portex Channel Distribution.

**Issued as Portex Tokenkeys and  
Currentkeys are IOU value contracts  
representing rights and obligations  
and objectives held by Portex  
Supporters and Users.**

Tokens used become **Currents** with their own new set of properties and instructions.

A Portex is the organizing context space where **token keys** and **current keys are forged and sustained** and are interconnected and interwoven with the other Portexes and the Whole (World) in order to form a Civilizational Context to fulfill the inspired purposes of the Wholonomic Communecology.

**Token Keysets and Current Keysets  
always have these physical  
and conceptual aspects**

There is an issuer.

Tokens and Currents have a substrate that ensures its security and validity.

A system whereby they are meaningful, have meaning.

They have a value to someone.

Genichain will track the currents and tokens and will be actual valuating entities, backed by a tangible; assets, margins, projections, project activity of the Portex.

Token and Currents is either mostly active or mostly passive.

**Passive Currents** plays the role of exchange mediums in a system, holding value and collecting various sorts of rents.

**An active Token or Current** can accomplish things, enabling its holder to do things. We will build more and more business logic features into our tokens. Active Tokens are tradable API keys.

Is there a Limited or Unlimited Supply?

How does **Local Tokenization** atomize value?

Is there some type of Equity or is there No Equity.

Do we have a fee-paying  
or non-fee paying token?

What are the transferability  
conditions?

Scalability and how we use it to build  
community into the Portex.

# Wholonomic Token Structures and Current Flow Models Used

**Is the flow Straight line**, from source to sink created for a single purpose and destroyed after used. Coupons and passes are in this category

**Are Currents that are** used as currency in system, do system providers send them back to a cashier agency to exchange them.

Are they **Circular with** exchanges flowing back and forth?

What is the Payloads Delivery Method and Vehicle used?

What the divisibility conditions of the Tokens and Currents? How it divisible, easily divided into fractions?

Are they are transferable or non transferable, identical or unique?

How will they implement Key Management Services (KMS)

How do they store private, sensitive data governed by international data security laws

All this is stored as the “Genichain DNA” of the Token or Current forming the foundation to become tradable and storage of value assets.

**Determining Policy Aspects  
for Portex and Token and Current  
type.**

**What makes it Durable, Maintaining Value? What is it's intrinsic value?**

Forks. Yes or no?

How are Monetary Policies decided

Fiscal Policies decided

Fungibility aspects defined

Token Distribution and Exchange  
methodologies

How to create the Token or Current  
to be Convenient?

What makes the Token Consistent?

**Portexes** focus multiple related projects with unique sets of token and currents keys and platforms to achieve beneficial results.

**Portex Supporters are themselves the users, designers and decision makers, issuing and running the Smart Contracts and Platform Operations.**

**Some of the many of the functional  
and technological steps to launch  
Wholonomics.**

**Principle: We create a customized work  
architecture weaving distinct competencies  
together to frame and drive toward creative  
centered solutions. We develop solutions to  
enhance organization and overall position by  
employing strategic evaluation of design  
components in the development of our  
Wholonomic models:**

# **Holomid are about External Values Accounting and Balancing**

Wholonomics is a paradigm bending metaplatform for public marketplaces.

Wholo'Teams are transaction facilitation intermediaries.

Wholonomics is grounded in highly secure decentralized applications with the ability to provide diverse ways of exchanging value securely and anonymously.

Wholonomics links Soul  
and the marketplace.

Embracing certainty of identity and capability through the whole chain will break present conventions.

Bypassing the gatekeepers becomes possible while serving our core needs.

**Hyperdimensionally** we break the silence and end the isolation. We fire the defining story-tellers. **We live our own new stories.**

Evolution proceeds not in a smooth and linear fashion. What happens is that a few members evolve followed by a major rear guard action thrown up by the dominating forces. But eventually the pressure builds up to such a level that nothing can stop the inevitable, and the whole species rapidly rises to a **new level of coherence and order.**

We evolve past centralizing linear control grids to sharing a decentralizing holospace.

**To end the control of the Money Supply by the Money Power and bring it back to where it belongs: the individuals forming the Commonwealth as Common Wealth.**

To allow equitable access to all. As opposed to now, where the Money Power only finances what it owns or wants to own starving the rest from credit.

Credit creation will be a trust held  
in common agreement.`

**Social Free Energy is transformed into action.** As a result every aspect of our lives will be touched and up leveled. **Free Energnomics** does not serve the exclusive interests of any individual or organization.

We have the courage to practice long-term thinking and to make bold, courageous, anticipatory decisions before problems reach crisis proportions.

**New root paradigms can shift the field dynamics. This across scale journey of our collective.**

Wholonomic validity is the sense it makes in and of itself.

Purpose is inherent in its context and form. It is not organized by rigid status.

Benefiting the whole is the basis of our incentives. Collective success leads to personal enhancement and improving circumstances.

Wholomid Space dissolves avarice without eliminating self-initiation.

The ultimate solution to end wars is for the people to transcend this economic system altogether, this **Dysfunctional Human Creation** that the controllers preside over. The ultimate solution is to recreate in its place another with an **Enlightened Foundation**.

A Foundation our children and their children will thank you for, for bringing to them a peaceful and healthy World.

How do we start? By stepping out and getting others to do likewise. **Bypassing fiat rule is our single option.**

**Attempting to somehow or other organize countless points of view is not what Wholonomics is based upon.**

Wholonomics is about Wholeness that transcends point of view, so **Wholeness can be returned to its rightful seat as the principle head of social organization.**

Wholonomics is at its core about the emergence of a universal representative of the **Primordial Wholeness of Creation**, the power that can self-organize, self-correct and self-righten the indivisible whole of everything and everyone. **Awake and aligned, we together become clear and conspicuous and cooperative Pathways to the Deep Destiny of Humanity.**

**We can have a basis that transcends  
the current civilizational constructs.**

**The Wholomid as archetype** by organizing itself can infuse **Humanity** with **self-rightening Primordial Wholeness** through **Shared Fields** functioning as **catalytic integrating systems**. Self-organizing, self-correcting forces modeled as whole can **seed illumination in this bonded-age**.

**The Wholomid is a tangibly active representative of egoless Space for self-integrating Human-Awareness to unfold.**

**This is not a metaphysical or abstract doctrine, or a good idea or a plan for a new marketing system. Wholonomics is about Invoking The Whole creating focal points for flowing Actions of the Whole.**

**Wholonomics** honors us for who we are and treats us as treasures of the universe. **Wholonomics** places priority on nurturing and developing our potential.

**Liberating Awareness** is the basis of mutual respect and empowerment.

**To be who we are in the big picture** and not narrowed and compressed and boxed into roles as a commodity or object.

Wholonomics gives us freedom to live from the inside out. We can experience each other and ourselves as free and great beings. We have the possibilities of **Wholeness Awakening**.

By questioning implicit assumptions we can **realign moral and economic incentives** into greater harmony. We transcend collective and individual contradictions.

Wholonomics has new metrics and measurements of valuation and exchange. Wholonomics **coalesces a new kind of space to free us from the economics of tyranny.**

The Wholomid evokes dynamic systems of exchange by distributing value dimensionally across scale; from local, to the **Global World Architecture while accounting for all costs and rewarding socially positive behavior.**

Relationships of exchange are shared and held as a **Shared Fields of Humanity, referred to here as Scalar Fields.**

The Wholomid expresses a **shift of our architecture of social organizing**. The Wholomid envisions civilizational transformation, **universal hyper-dimensional seeds** to flower a **renewal of inspired determination**.

**Wholonomics** has the capacity to revalue every kind of exchange and every kind of wealth.

**We here invoke meaning  
empowered by the Principle of  
*Cosmic Life Terrestrial Necessity*,  
we untangle and discard the doctrine  
of *Martial and State Necessity*  
evoked through the ages  
to perpetuate Pyramid Dynamics.**

**Wholonomics can in no way to be compared to Marxism, Collectivism, Socialism, Capitalism, debtism or any other Pyranomic "controlism". None of these entropic dead ends can sustain or conceive of Civil Dimensional Architecture.**

**The Wholomid can be a tamper proof, boom-and-bust proof Space of Unified Fields of Resonant Wealth.**

The Pyramid control grid can be short-circuited.

We can emerge order that is **Wholodigeous**. Where **Form and field are interconnected**. Where the universe that is relationships, infinitely greater than the universe of objects can predominate.

We through application of natural process empower ourselves as a **Whole Person, a Whole Flow and a Whole Humane-kind**. The conceptual basis is here. Together we are the actors and the creators, the visionaries.

This Prototype birthed is where we can act everywhere at once, cooperating from a spiritual platform.

**Spiritual people do not need a parent state.**

**Wholonomics** projects are  
activated and fulfilled  
issuing **Portex tokens and currents**  
generating a **Multidimensional**  
**Wealth Flow** through  
a **Hyperdimensional Geometry**  
by **Dimension Zero** participants.

The Currents are Shared **via**  
**Decentralized dAppchanges and**  
**community means.**

**These Current Measured and  
Denominated in Solamids and Milaurum  
Are underwritten by Commodity Reserves  
and Innerprise Reserves issued as Free-  
Notes through Escrow Trusts Using  
CoXexus NetsWorth Verification Channels.**
