

# Communecology Tokens

## **Scope of the Project**

### **Attention: The Foundation Funders**

I will barely summarize our inter-related Communecology Token project. We will provide more details on each of the sub-projects in later publications.

**1. Globamid - Developing a Network of effective healing and rejuvenation centers exploring, researching and developing the most effective natural healing methods. Methods that promises to significantly reduce health and wellness costs.**

**2. Wolomid - Research and development methods to radically enhance the intelligence, abilities and faculties of humankind.**

### **3. Identification and promoting the most effective new energy technologies**

**4. Reserves - Environmental  
energy projects that can leverage  
the reliance on oil and non-  
renewable resources**

**5. Transform the food production methods for people in poor such that yields increase without the need for further capital intensive aids.**

**6. Make available to the marketplace new methods for constructing basic infrastructures.**

**7. Modular housing technologies – non-profit dissemination and marketing of the most efficient housing technologies. Support local solutions to obtain a global presence and positive reputation.**

**8. Empower innovative economic models that can help the disenfranchised – homeless have the resources for housing and receiving basic needs.**

**9. Support children rights through the developing of e-marketplaces for local economies making child labor unnecessary.**

**10. Psychiatric and mental health services that will help restore the balance of the mind and body through natural processes.**

# **11. Process for the Token Scalarization of the Third World.**

**Most of the local resources, real estate and business are in the informal economy and have not the means to be capitalized.**

All these projects will be created to provide as many jobs as possible using labor values more than capital value.

**Commodity, Innerprise and  
Transtructural Reserve Tokens  
Issued fund projects and  
infrastructure activity and  
scalarize them.**
